Trade-In & Take Back Solutions

Easily Implement, Manage, and Monitor Your Trade-In Program with Our Turn Key Solution, or Work with Us to Customize for Your Needs.

HOW IT WORKS

Get a Quote

Quotes are easily created by answering a few short questions using our online tool. Mail notifications and trade-in account link provide real-time status updates for each trade-in interaction.

Ship it Free

PowerON provides free shipping and packaging materials. Shipping instructions are sent via email. We use trusted carriers and track each shipment to protect the device while in transit.

Get Paid

Upon arrival each device undergoes data destruction. Then trained technicians audit the device to confirm its condition. Expect to receive payment within 7-10 days of shipping your device.

Take back, trade-in, returns, and recalls all function pretty much the same way. We manage this process more effectively than anyone in the business.

PowerON provides our Fortune 500 customers with an easily branded "white label" trade-in solution for their consumer direct accounts, educational accounts, small business accounts and enterprise accounts.

PowerON's team has the experience and professionalism to work directly with our client's customers to complete a Trade-in transaction or we can provide a completely automated back-end quote process that includes training and process support, which allows our clients to run their own "in house" branded trade-in program. PowerON will custom tailor programs to meet our client's sales process flow and match any branded look and feel requirements requested.
